Premium metal roofing: Slate & Shakes

Design and Durability

ABC Roofing's premium metal shakes and slate were developed for roofing and sidewall applications utilizing the latest technology to be environmentally safe and extremely long lasting.

It's more than just ordinary roofing. Unlike traditional roofing products, ABC Roofing will not warp, split, peel or crack, and defies winds up to 160 mph. They easily withstand frigid northern winters as well as the blistering southern sun.

Coated with a deluxe KYNAR 500® finish to maximize color retention, ABC Roofing is available in a range of solid and blended colors. (For EnergyStar ratings, see color chart.) The unique double embossing pattern adds panel strength strong enough to be walked on and can be applied over an existing roof.

Excellent Performance

ABC Roofing has a unique 4-way locking system engineered to handle the harshest of weather conditions. Permanent and virtually maintenance-free, an ABC roof will last a lifetime.

The next wave in lasting building materials should make ABC Roofing your first choice for your project.

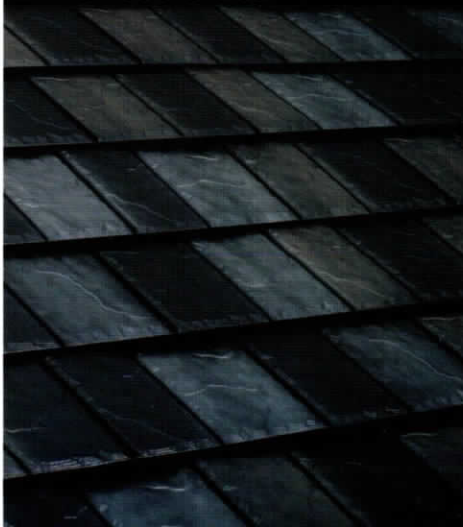

ABC Roofing: Slate

ABC Roofing: Shake

Enhanced Slate

Enhanced Shake

The curb appeal of ABC Roofing ... is surpassed only by its durability.

Residential

ABC Roofing protects your valuable assets from damage in extreme weather conditions.

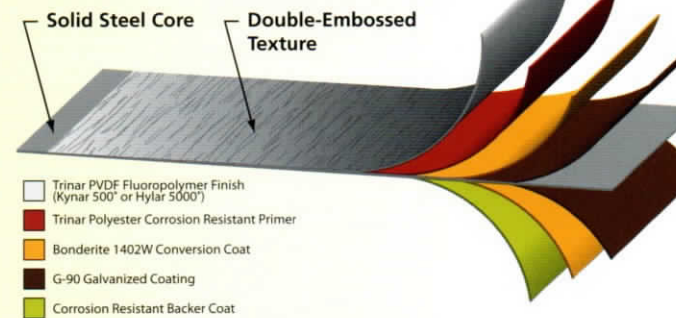

Beyond brute strength, most of our roofing colors have been formulated to meet or exceed EnergyStar reflectivity and emissivity standards – saving you money on your utility bills.

In addition, ABC Roofing meets many insurance companies requirements for discounts, so remember to call your agent.
